Safi, Morocco

Full-Stack Developer

## SUMMARY

Results-driven Full Stack Developer with 4+ years of experience building scalable web applications and SaaS platforms. Specialized in React/Next.js, Node.js, and TypeScript with focus on performance optimization and security. Recently launched Blutto – a team productivity platform with real-time collaboration and enterprise-grade features – achieving 99.9% uptime and supporting 25+ concurrent users. Skilled in translating business requirements into robust technical solutions.

## EDUCATION

Independent Learning Program – Web Development

2020–Present – Practical Projects & Online Certifications

## SKILLS

Frontend Development: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion

Backend Development: Node.js, Express.js, RESTful APIs, WebSocket, NextAuth.js

Database Systems: MongoDB, PostgreSQL, MySQL, Redis

DevOps & Deployment: Git/GitHub, Vercel, CI/CD Pipelines

Security & Performance: JWT/OAuth2.0, HTTPS, Data Encryption, Performance Optimization, Caching

## CERTIFICATIONS

React Performance Optimization | Codecademy | 2024

Advanced TypeScript | Udemy | 2024

Web Accessibility (WCAG 2.1) | LinkedIn Learning | 2024

Frontend Masters: Advanced React Patterns | 2024

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer

Blutto – Team Productivity SaaS Platform

2024 - Present | Remote | [blutto.com](#)

Architected and deployed a full-featured SaaS platform for team collaboration, serving 25+ concurrent users with 99.9% uptime.

- Built a full-stack web app featuring real-time chat, Kanban boards, analytics dashboard, and workflow automation using React/Next.js and Node.js
- Implemented enterprise-grade security with JWT/OAuth 2.0, SSO integration, and role-based access control – achieving full compliance and zero security incidents
- Integrated APIs with Slack, Google Calendar, and GitHub, reducing manual coordination by 60% through automation
- Designed and deployed a tiered pricing model (Free / Pro / Business) with full Stripe integration for subscriptions and billing management
- Achieved sub-200ms response times across all modules through advanced caching, optimized queries, and code splitting

### Fullstack Developer

E-Commerce Platform | 2023 - Jul 2024

- Architected and implemented a microservices-based product catalog system that scaled to handle 500K+ products with 99% uptime, increasing search performance by 35%.
- Engineered a comprehensive performance strategy reducing critical rendering path by 30% through advanced code splitting, dynamic imports, and CDN edge caching in Next.js applications.
- Developed and optimized RESTful APIs using Node.js and Express, improving backend response times by 40% and enabling seamless data flow between services.
- Implemented secure authentication and authorization systems using JWT and OAuth2.0, ensuring GDPR and financial data protection compliance with zero security incidents.
- Designed and optimized MongoDB database schemas and queries, reducing data retrieval times by 35% and improving application responsiveness for high-traffic scenarios.
